Detailed Action

Response to Amendment

Claims 21-34 are pending. This action is in response to the amendment received October 10, 2008.

Response to Arguments

Applicant's arguments with respect to claims 21-34 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 21-34 are rejected under 35 U.S.C 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth below:

In order for a method to be considered a "process" under §101, a claimed process must either: (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials). *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972). If neither of these requirements is met by the claim, the method is not a patent eligible process under §101 and is non-

Art Unit: 3695

statutory subject matter. With respect to all the independent claims, the claim language does not include the required tie or transformation and thus is directed to nonstatutory subject matter. For example, independent claim 21 only comprising of steps for data manipulation.

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Here, applicant's method steps, fail the first prong of the new Federal Circuit decision since they are not tied to another statutory class and can be preformed without the use of a particular apparatus. Thus, claims 21-34 are non-statutory since they may be performed within the human mind.
